SUPERSAFE 150N

Crewsaver's complete range of children's lifejackets are specifically designed for children, so whether you need something for general in-water play, dinghy sailing or even ocean sailing, there is a Crewsaver to suit.

The Supersafe 150N is perfect for those venturing further offshore including ocean sailing and is one of the only foam lifejackets for children in the 150N 'Offshore' rated category. Higher buoyancy levels result in quicker spin times, increased collar stability and greater mouth freeboard (distance from water to mouth).

Complete with a built-in safety harness, the Supersafe 150N accommodates the use of a safety line which is recommended when sailing in rough conditions or sailing during night passages.

The Crewsaver children's range now completely outperforms existing products on the market to give your child the safest introduction to life on-board.
